```
SELECT *  
FROM ENROLLED_STUDENTS  
ORDER BY LastName ASC;
```

-- 10. Write a query to retrieve the details of courses from the COURSES table where the Credits are between 2 and 5 (inclusive).

```
SELECT *  
FROM COURSES  
WHERE Credits BETWEEN 2 AND 5;
```

-- 11. Write a query to retrieve the details of students from ENROLLED_STUDENTS where the PhoneNumber is NULL.

```
SELECT *  
FROM ENROLLED_STUDENTS  
WHERE PhoneNumber IS NULL;
```

-- 12. Write a query to retrieve the first three students with the smallest StudentID from the ENROLLED_STUDENTS table.

```
SELECT *  
FROM ENROLLED_STUDENTS  
ORDER BY StudentID ASC  
FETCH FIRST 3 ROWS ONLY;
```

-- 13. Write a query to retrieve all columns from the COURSES table where the CourseName contains the word 'System'.

```
SELECT *  
FROM COURSES  
WHERE CourseName LIKE '%System%';
```

-- 14. Write a query to retrieve the details of students from the ENROLLED_STUDENTS table who were born in the year 2000.

```
SELECT *  
FROM ENROLLED_STUDENTS  
WHERE EXTRACT(YEAR FROM BirthDate) = 2000;
```

-- 15. Write a query to retrieve the details of students from the ENROLLED_STUDENTS table where the FirstName is 'John' and the LastName is 'Doe'.

```
SELECT *  
FROM ENROLLED_STUDENTS  
WHERE FirstName = 'John'  
AND LastName = 'Doe';
```

-- 16. Write a query to retrieve all columns from the COURSES table, ordered by CourseName alphabetically.

```
SELECT *  
FROM COURSES  
ORDER BY CourseName ASC;
```

-- 17. Write a query to retrieve the details of students from the ENROLLED_STUDENTS table where the StudentID is between 100 and 200.

```
SELECT *  
FROM ENROLLED_STUDENTS  
WHERE StudentID BETWEEN 100 AND 200;
```

-- 18. Write a query to retrieve the details of students from the ENROLLED_STUDENTS table who were born in the month of December.

```
SELECT *  
FROM ENROLLED_STUDENTS  
WHERE EXTRACT(MONTH FROM BirthDate) = 12;
```

-- 19. Write a query to retrieve all columns from the COURSES table where the Credits are not equal to 3.

```
SELECT *  
FROM COURSES  
WHERE Credits <> 3;
```

-- 20. Write a query to retrieve the details of students from the ENROLLED_STUDENTS table where the LastName contains the letter 'o'.

```
SELECT *  
FROM ENROLLED_STUDENTS  
WHERE LastName LIKE '%o%';
```
