

1. Title :-  
Bookstore API Testing using Postman

## 2. GET Request

Method: GET

URL: <https://fakerestapi.azurewebsites.net/api/v1/Books>

### Test Script:

```
pm.test("Status code is 200", function () {  
    pm.response.to.have.status(200);  
});
```

```
pm.test("Response not empty", function () {  
    var data = pm.response.json();  
    pm.expect(data).to.not.be.empty;  
});
```

## 3. POST Request

Method: POST

URL: <https://fakerestapi.azurewebsites.net/api/v1/Books>

### Body:

```
{  
    "id": 102,  
    "title": "New Book",  
    "description": "Learning API",  
    "pageCount": 150,  
    "excerpt": "Intro",  
    "publishDate": "2026-01-01T00:00:00Z"  
}
```

### Test Script:

```
pm.test("Status code is 200", function () {  
    pm.response.to.have.status(200);  
});
```

```
pm.test("Book created successfully", function () {  
    var jsonData = pm.response.json();  
    pm.expect(jsonData.id).to.eql(102);  
});
```

#### **4. PUT Request**

Method: PUT

URL: <https://fakerestapi.azurewebsites.net/api/v1/Books/101>

##### **Test Script:**

```
pm.test("Status code is 200", function () {  
    pm.response.to.have.status(200);  
});
```

#### **5. PATCH Request**

Method: PATCH

URL: <https://fakerestapi.azurewebsites.net/api/v1/Books/101>

##### **Note:**

PATCH returned 405 Method Not Allowed because API does not support PATCH.

#### **6. DELETE Request**

Method: DELETE

URL: <https://fakerestapi.azurewebsites.net/api/v1/Books/101>

##### **Test Script:**

```
pm.test("Status code is 200", function () {  
    pm.response.to.have.status(200);  
});
```
